#MealPrepSunday

HASHTAG TIPS

When you are searching for the perfect hashtag, you ideally want one that has between 10,000-900,000 tags.

You can find this information by searching the hashtag in instagram.

If your hashtag has too many tags (millions), your post has less chance of being seen. Too few tags, and people aren't searching it, unless you are claiming the hashtag for your niche/business.

Use a maximum of 30 hashtags per post.

ABOUT ME

Hi, I'm Desiree. Digital marketer and specialist in organic marketing.

This is what I know to be true: marketing your business online doesn't have to be complicated.

I make the complicated, simple. The impersonal, personal. And turn clutter into clarity.
